1. Commands to install extensions:
2. Open terminal/powershell:
3. And execute these set of commands:

```

code --install-extension adpyke.vscode-sql-formatter
code --install-extension alefragnani.project-manager
code --install-extension arturock.gitstash
code --install-extension batisteo.vscode-django
code --install-extension bigonesystems.django
code --install-extension codezombiech.gitignore
code --install-extension donjayamane.git-extension-pack
code --install-extension donjayamane.githistory
code --install-extension DotJoshJohnson.xml
code --install-extension dsebastien.vscode-git-pack
code --install-extension eamodio.gitlens
code --install-extension esbenp.prettier-vscode
code --install-extension felipecaputo.git-project-manager
code --install-extension GitHub.codespaces
code --install-extension GitHub.remotehub
code --install-extension GitHub.vscode-pull-request-github
code --install-extension mhutchie.git-graph
code --install-extension ms-azuretools.vscode-docker
code --install-extension ms-python.isort
code --install-extension ms-python.python
code --install-extension ms-python.vscode-pylance
code --install-extension ms-toolsai.jupyter
code --install-extension ms-toolsai.jupyter-keymap
code --install-extension ms-toolsai.jupyter-renderers
code --install-extension ms-toolsai.vscode-jupyter-cell-tags

```

```
code --install-extension ms-toolsai.vscode-jupyter-slideshow
code --install-extension ms-vscode-remote.remote-containers
code --install-extension ms-vscode-remote.remote-ssh
code --install-extension ms-vscode-remote.remote-ssh-edit
